## EXPERIENCE

### Assistant Cloud Architect

**ACG**

May 2024 – Ongoing | Hyderabad, IN

- Architected and implemented a cloud-native supply chain management platform on Azure using Dotnet, Angular, and GraphQL, optimizing scalability and performance while ensuring seamless migration from on-premise systems.
- Designed infrastructure-as-code with Terraform, enabling 50% faster provisioning and achieving 99.9% uptime, while establishing cloud architecture patterns for enhanced system scalability.
- Developed an open-source EPCIS validation package, reducing syntax errors by 80% and ensuring compliance with EPCIS 1.2 and 2.0, driving global market adoption and increasing recurring revenue.

### Cloud Specialist

**LTIMindTree!**

Oct 2022 – May 2024 | Hyderabad, IN

- Led full-stack architecture and development on Chevron Tengiz System Completion Tool, building responsive frontend interfaces using React.js and backend services on .NET Core.
- Designed and implemented Azure cloud infrastructure: Function Apps, App Services, Azure Data Factory, Azure Active Directory, and Storage Accounts.

### Manager

**Capgemini**

Dec 2019 – Oct 2022 | Hyderabad, IN

- Adverse News Detection: Architected a KYC-compliant ML platform enabling clients to detect compliance risks via machine learning. Designed cloud services and web application layers to support Python-based AI/ML models.
- I worked on developing a cloud-first solution for a Belgium-based financial services company, which is responsible for handling the settlement of securities along with the safekeeping and asset servicing of these securities.
- The application aimed to provide issuers with valuable insights into the structure of their shareholding and the intermediaries a simple and easy mechanism to be compliant with new SRD II obligations

### Research Engineer

**Conduent**

Dec 2018 – Dec 2019 | Hyderabad, IN

- Responsible for identifying customer personas and mapping their journey to improve experience through digital transformation and enablers.
- As a senior developer, I am responsible for integrating various Azure services, such as App Services, Azure Functions, Azure Batch Service, Azure Storage Services, and Cognitive Services.

## MOST PROUD OF

**Hackathons**

- Stood 2nd Position in hackathon in 2018 conducted by Capgemini.
- Stood 4th Position in hackathon in 2022 conducted by Fintech company.

**Competition**

Won 1st Prize in All India Stimulated Business games

**Persistence**

I took up the projects that were in red zone and critical for the company and successfully delivered with zero defects

**Certification**

Microsoft Certified Profession AZ-303 , AZ-304, AZ-204

## STRENGTHS

Hard-working (18/24) | Persuasive | Motivator & Leader

Dotnet Core | Azure | C sharp | React.js | Angular | Python | SQL Server

## LANGUAGES

**English**
**Telugu**
**Hindi**

## EDUCATION

### M.B.A. in Marketing and Finance

**Gitam University**

Mar 2011 – Apr 2013

### B.Tech. in Electronic Communication Systems

**JNTU University**
