EXPERIENCE

AI Solutions Architect (Freelance)

NewMEK

2024 – Ongoing Remote

- Architected an AI-driven hiring platform using Retrieval-Augmented Generation and Agentic AI, orchestrated with LangChain and LangGraph on Azure OpenAI, automating candidate document generation, and audio/video/resume profile extraction.
- Built a fitment mapping engine that scores candidate-role match, and an agentic video proctoring workflow that reviews interview recordings and flags session integrity as positive or non-compliant flow.
- Developed a web scraping tool to source and aggregate candidate profiles and job postings, feeding structured data into the platform's profile extraction and fitment-scoring pipeline.
- Delivered Yono, a citizen-reporting application for tracking and escalating pothole repairs, from concept through deployment.

AI & Cloud Solutions Architect

ACG

May 2024 – Ongoing Hyderabad, IN

- Architected and implemented a cloud-native supply chain management platform on Azure using Dotnet, Angular, and GraphQL, optimizing scalability and performance while ensuring seamless migration from on-premise systems.
- Designed infrastructure-as-code with Terraform, enabling 50% faster provisioning and achieving 99.9% uptime, while establishing cloud architecture patterns for enhanced system scalability.
- Developed an open-source EPCIS validation package, reducing syntax errors by 80% and ensuring compliance with EPCIS 1.2 and 2.0, driving global market adoption and increasing recurring revenue.
- Built a natural-language virtual assistant on Azure OpenAI and Azure AI Services, layered onto the supply chain platform to let users query shipment and EPCIS compliance status conversationally.
- Lead and mentor a small AI engineering team, owning technical direction for AI-driven features and driving delivery of AI solutions across the platform.

Cloud Specialist

LTIMindTree

Oct 2022 – May 2024 Hyderabad, IN

- Led full-stack architecture and development on Chevron Tengiz System Completion Tool, building responsive frontend interfaces using React.js and backend services on .NET Core.
- Designed and implemented Azure cloud infrastructure: Function Apps, App Services, Azure Data Factory, Azure Active Directory, and Storage Accounts.
- Added a natural-language understanding layer to the System Completion Tool using Microsoft LUIS and Azure Cognitive Services, enabling engineers to query completion status and reports conversationally.

Manager

MOST PROUD OF

Hackathons

- Stood 2nd Position in hackathon in 2018 conducted by Capgemini.
- Stood 4th Position in hackathon in 2022 conducted by Fintech company.

Competition

Won 1st Prize in All India Simulated Business games

Persistence

I took up the projects that were in red zone and critical for the company and successfully delivered with zero defects

Certification

Microsoft Certified Professional AZ-303, AZ-304, AZ-204

EDUCATION

M.B.A. in Marketing and Finance

Gitam University

Mar 2011 – Apr 2013

B.Tech. in Electronic Communication Systems

JNTU University

Mar 2007 – Mar 2011

Capgemini

Dec 2019 – Oct 2022 Hyderabad, IN

- Adverse News Detection: Architected a KYC-compliant ML platform enabling clients to detect compliance risks via machine learning. Designed cloud services and web application layers to support Python-based AI/ML models.
- Developed a cloud-first solution for a Belgium-based financial services company, which is responsible for handling the settlement of securities along with the safekeeping and asset servicing of these securities.
- The application aimed to provide issuers with valuable insights into the structure of their shareholding and the intermediaries a simple and easy mechanism to be compliant with new SRD II obligations
- Built a compliance-query chatbot and Alexa voice skill using Botpress, Microsoft Bot Framework, and NLP techniques, giving analysts conversational and voice-based access to adverse-news and KYC search results.

Research Engineer

Conduent

Dec 2018 – Dec 2019 Hyderabad, IN

- Responsible for identifying customer personas and mapping their journey to improve experience through digital transformation and enablers.
- Senior developer responsible for integrating various Azure services, such as App Services, Azure Functions, Azure Batch Service, Azure Storage Services, and Cognitive Services.

Consultant

Capgemini

Nov 2017 – Dec 2018 Hyderabad, IN

- Worked as a Software Engineer in the Manufacturing Sector to develop a hybrid mobile app for the attendance of the employees and create learning modules.

Technical Analyst

New MEK

Mar 2013 – Nov 2017 Hyderabad, IN

- Worked as a Software Engineer and developed web applications for the health care domain like creating virtual Appointments and viewing neuro health records.
